

Prescribed Fire Workshops

Thursday, August 11, 2016

Where: Mineral Area College
5270 Flat River Road
Park Hills, MO 63601
Arts and Science Building
Rice Lecture Hall B

When: 1:00 -4:30 pm and
6:00- 9:30 pm

Presented by: Missouri Department of Conservation

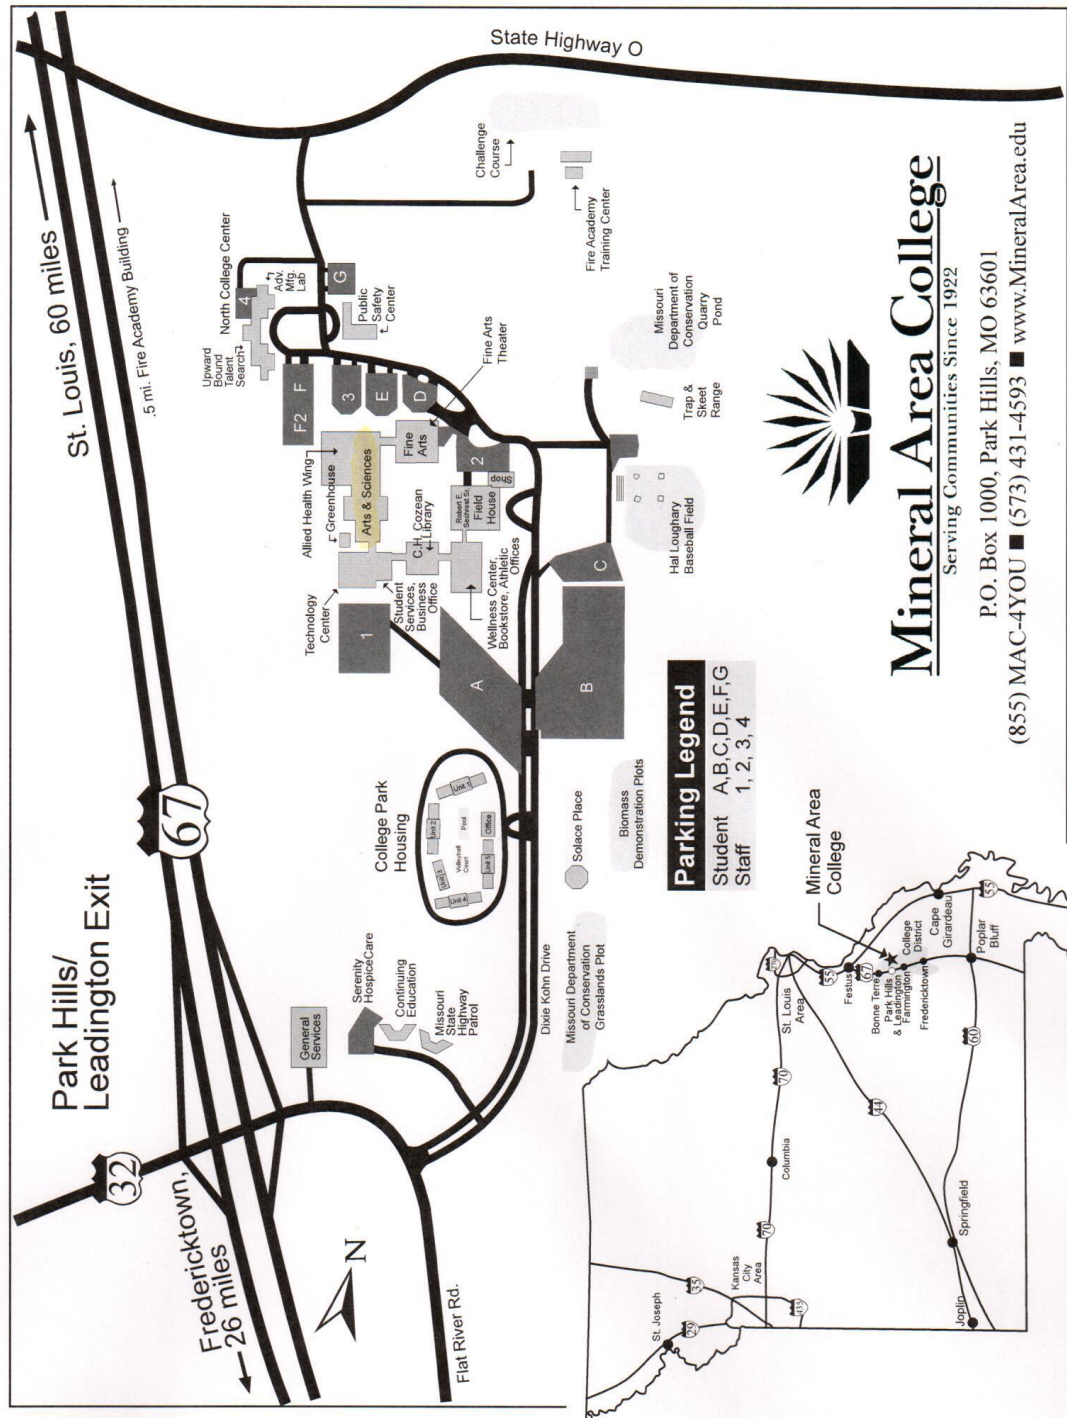

This workshop will be given two different times to provide landowners a better opportunity to attend.

Prescribed fire is a low cost way for landowners to manage grasslands, CRP, old fields, glade and woodland complexes for forage production and/or improve wildlife habitat.

This workshop will include classroom discussions on methods, equipment, safety, and why and when you would use fire as a management tool. Emphasis will include how to conduct a safe and effective burn to control sprouts, encourage beneficial plants and create better quality pollinator, butterfly, small game, quail, deer and turkey habitat. Participation will qualify landowners to have a prescribed burn plan prepared for their property and use available loan equipment.

Attendees will also be invited to optional demonstration burns which will be conducted at a later date around the region to demonstrate the use of tools and techniques.

To register for one of the workshops please contact the Missouri Department of Conservation at 573/290-5730.
